

## Technical Information about 8-Bu(3-yne)T-NAD<sup>+</sup>

Update: June 20, 2019 AI

**Abbreviation:** 8-Bu(3-yne)T-NAD<sup>+</sup>

Formula	CAS No.	Molecular Weight	UV	BIOLOG Cat. No.
C <sub>25</sub> H <sub>31</sub> N <sub>7</sub> O <sub>14</sub> P <sub>2</sub> S (free acid)	[2022926-15-2]	747.6 (free acid)	λ <sub>max</sub> 276 nm / ε 21400 / pH 7	N 055

**Name:** β- Nicotinamide- 8- (3- butynylthio)adenine dinucleotide

**Description:** 8-Bu(3-yne)T-NAD<sup>+</sup> is an analogue of the natural signal molecule β-NAD<sup>+</sup>, in which the hydrogen in position 8 of the heterocyclic nucleobase is replaced by the lipophilic 3-butynylthio moiety.

**Properties:** 8-Bu(3-yne)T-NAD<sup>+</sup> is a clickable analogue of β-NAD<sup>+</sup>, for labelling substrate proteins of poly(ADP-ribose) polymerases (PARPs) by click-chemistry.

**Legal information:** The Reagent is protected by patent US9926340 (B2) - NAD ANALOGS AND METHODS OF USING SAID NAD ANALOGS IN DETERMINING RIBOSYLATION OF PROTEINS WITH PARP MUTANTS and foreign equivalents. Applicants: THE BOARD OF REGENTS OF THE UNIV OF TEXAS SYSTEM [US]; BIOLOG LIFE SCIENCE INST FORSCHUNGLABOR UND BIOCHEMICA-VERTRIEB GMBH [DE]; UNIV CORNELL [US]. The Reagent is sold under limited, non transferable and non exclusive licence from the applicants for research purposes only to the exclusion of any commercial use, transfer or otherwise sale of this Reagent or its components or derivatives to a third party.

Use of reagent by companies or for-profit entities may require a license from The University of Texas Southwestern Medical Center in Dallas ("INSTITUTION") prior to shipping.

This Reagent is experimental in nature and BIOLOG and INSTITUTION make no representation and extend no warranties of any kind, either express or implied, including any implied warranty of merchantability or fitness for a particular purpose, or any warrant of non-infringement of any patent, trademark, or other intellectual property rights.

In no event shall BIOLOG or INSTITUTION be liable for any use of the Reagent, and Recipient hereby agrees to defend indemnify and hold BIOLOG and INSTITUTION harmless from any loss, claim, damage or liability which may arise from Recipient's use, storage and disposal of the reagent.

Other restrictions may apply to the use of the Reagent, please read all of the materials provided.

**Specification:** Lyophilized or crystallized sodium salt. Other salt forms are available upon request. Equal concentrations of 8-Bu(3-yne)T-NAD<sup>+</sup> can appear very different in volume due to sensitivity of the lyophilized form to humidity. The compound can even contract to small volume droplets. Normally the product is located in the conical bottom of the tube. Micromolar quantities are determined by UV at λ<sub>max</sub>.

**Purity:** Typical analysis is better than 95% (HPLC / UV / 276 nm). The product is not sterile and has not been tested for endotoxins.

**Solubility:** 8-Bu(3-yne)T-NAD<sup>+</sup> is soluble in water ( $\geq 5$  mM, limits have not been determined). Please rinse tube walls carefully and preferably use ultrasonic or vortex to achieve total and uniform mixing. When opening the tube please make sure that no substance is lost within the cap.

**Stability and Storage:** 8-Bu(3-yne)T-NAD<sup>+</sup> has limited stability at ambient temperature. We recommend that the compound should be stored in the freezer (-20° Celsius necessary, -80° recommended), for longer storage periods preferably in freeze-dried form.

**Toxicity and Safety:** Since  $\beta$ -NAD<sup>+</sup> has multiple tasks in every organism, it is very likely that its analogues will interfere with many cell regulation processes *in vivo*. However, due to the rather small quantities to work with, no health hazards have been reported. Nevertheless please keep in mind, that the *in vivo* properties of this compound are not sufficiently characterized up to now. Avoid skin contact or ingestion and allow only trained personnel to handle the product.

Our products are designed, developed and sold for research purposes only! They are intended for *in vitro* and nonhuman *in vivo* laboratory applications. Any other use requires approval of health authorities.

**Not for drug, household or related uses!**
